It's a good game. I've logged somewhere close to 1000 hours on this before finding it on steam. The online community is hit or miss, but the single player campaign is fantastic. Get a couple of friends, and get ready to fight for that last .001 of a second so you can win. Stupid physics, stupid speeds, \u2665\u2665\u2665\u2665ing amazing fun levels.. im mostly doing this coz of the background music..... but seriously, this game is very addictive. gameplay is very well done, and man the background music is good. Original price for the complete pack is a little over the top imo, but if you do have that much to spare, go for it. I wouldn't regret it .. Sonic The Hedgehog with 4 wheels. GOTTA GO FAST.. played on druagas game night today and had a great time going off the map on crappy maps

nawet fajne. this game is good and the type of game is a race. Can ride on all kinds of fertilizers and other developed or their routes. Can create their machines and map. And a good game.. Really cool game needs improvement tho!. TrakMania Nations Forever is a very salty game with much salt. wicked fast!!!!!!!!!!!! want speed? This games for you!. Free to play, but the free account is limited to an excessive, over the top amount. For example, you can only do 5 races in a row until you are basically forced to sit out and spectate the ENTIRE next race. Try to leave and join another? Nope, nice try. You are required to sit and wait for a good 5-10 minutes and if you try to leave to join another server it starts all over again. Five more races, and then another round of spectating. Sure, to most people that is fine and they suck it up but for a guy who likes to sit down, relax, and play for more than a little bit at a time that is a major let down. It sucks, because if they wouldnt have implemented that little limitation this game would be awesome. Great user made tracks, fast, arcade racing fun is what this game nails perfectly. I would recommend but they need to lift that limitation and get rid of it because its not for safety, for hackers, or anything for that matter. Its just a way to be a pain in the\u2665\u2665\u2665\u2665\u2665pushing you to buy the full game. Also, the full game is like \$20 or \$30 last time i checked. This game is pretty good, but it is not \$30 good. That being said, if you are willing to sit out every five rounds of racing and watch other people race, then download it. This version is free. Unless it is on sale for like \$5, stick to the free version.
